DETAILED ACTION

1. The Amendment filed 2/25/05 has been considered in preparing this Office action. The amendments to the claims and applicant's Remarks/Arguments have overcome the rejections recited in the prior Office action mailed 9/20/04.

Information Disclosure Statement

2. The examiner has considered the documents listed in form PTO-1449 submitted with the Information Disclosure Statement (IDS) received 2/25/05 (see the attached form PTO-1449).

Allowable Subject Matter

3. Claims 1, 3-5 and 7-34 are allowed; and are renumbered as 1-32.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to an active matrix liquid crystal display apparatus for displaying high quality color images. Each independent claims 1, 5, 10, 11, 13, 16, 18, 19 and 31 requires a driver circuit (60), see Fig. 3, comprising a maximum transmittance voltage limiter (80), see Fig. 5, for limiting an absolute value of levels of driving voltage signal; whereas, the closest prior art of record, the McKnight document (U.S. Patent No. 6,144,353) requires different upper limit values for different color driving voltage signal (see Fig. 2C); the Sakamoto et al. document (U.S. Patent No. 5,920,301) requires the voltage signal, VD, is set within the range of V0 and Vmax, see col. 8, lines 48-52; the Okumura et al. document (U.S. Patent No. 5,528,257) requires a ROM for storing a set of reference voltage data, and the Miyajima et al. document (U.S. Patent No. 4,942,458) requires that an effective voltage and transmittance in liquid crystal

differ among R, G, and B; which, either in singularly or in combination, fails to anticipate or render the claimed invention obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. It's U.S. Patent No. 5,528,257 to Okumura, which teaches an LCD apparatus having different processing channels for providing color driving voltages and a ROM for storing a set of reference voltage data.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Henry N. Tran whose telephone number is 571-272-7760. The examiner can normally be reached on M-F 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick N. Edouard can be reached on 571-272-7603. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
